Dear Charles,

Thank you for your interest in our products.

What type of data do you require?

<http://www.satimagingcorp.com/gallery.html>

In addition to imagery we can also provide value added services such as orthorectification and raster to vector translation that can be of great aid in GIS projects:

<http://www.satimagingcorp.com/services.html>

If you can send us the SHP file with the prj file and/or the datum and projection of the coordinates for your area of interest we can check our archives and find out what data we have available for your project. You may wish to review our pricing policy as well:

<http://www.satimagingcorp.com/pricing.html>

Once we identify the area that you are interested in, I can search for the appropriate data and send you the results of the search as well as a cost estimate for imagery. If you have any questions, please feel free to contact us.

Best Regards,

William Pora

Project Description

I am primarily interested in the Nushagak and Kvichak watersheds. But also a small portion of the Cook Inlet shoreline adjacent to these watersheds. The purpose is to assess environmental impacts associated with the Pebble Copper Mine.
